

Cable Avoidance Location Equipment (Cat scanner and Genny)

Course Summary:

This course is useful for anyone experienced or inexperienced who may be required to cut or drill into surfaces which may contain hidden and buried cables. It will stress the health and safety needs for using the equipment.

Training is delivered by an experienced qualified instructor and can take place at our Training Centre at Parkhouse Industrial Estate, Newcastle-Under-Lyme or alternatively at your own premises.

Aims and objectives of course:

- to ensure trainees understand the need to use location equipment and to teach them to operate the C Scope range of pipe and cable locators to their full extent in an accurate and safe manner.

Maximum number of delegates: 10

Duration: half day

For further information about dates/availability and costs, including multi-booking discounts contact:

Anthony Colley Tel: 01782 565797
email: ant@thorlightning.co.uk

We also undertake health and safety inspections within all types of organisations. Including risk assessments, COSHH assessments and asbestos awareness. For further details about these services plus other training courses currently available visit www.thorlightning.co.uk
