

Safe Use of Abrasive Wheels

Course Summary:

An essential course for those intending using abrasive wheels. Designed to minimise risk and improve safety in the workplace.

Training is delivered by an experienced qualified instructor and can take place at our Training Centre at Parkhouse Industrial Estate, Newcastle-Under-Lyme or alternatively at your own premises.

Aims and objectives of course:

- to enable trainees in the safe use of, correct selection and mounting of abrasive wheels in accordance with the relevant regulations

Trainees will be able to:

- use of abrasive wheels including hazards and precautions
- dress abrasive wheels where appropriate
- check whether discs or wheels are safe to mount
- methods of testing
- to understand the need for safe handling, transport and storage
- British standard marking system
- select the correct PPE

Maximum number of delegates: 10

Duration: half day
