

Case Study 432

Case Study **Queen Mary's Girls School, Walsall**

Client: **Queen Mary's Girls School**

Project: Thor Lightning Protection Ltd. has created and installed of a Lightning Protection System (LPS) at Queen Mary's Girls School, Walsall.

Key Note: We designed a tape on tile Lightning Protection System for this Victorian building. The project was completed within a six week time frame, whilst the school remained open. Access to the three storey building roof was achieved from scaffold towers, MEWPs and rope techniques .
